

Online Banking

Online Banking includes Direct Banking, Multi-Channel Banking and the integration of Banking & Personal Financial Services.

Open Financial Exchange (OFX)

Open Financial Exchange facilitates the sharing of financial data and instructions between customers and their institutions. OFX enables direct communications, eliminating the need for an intermediary.

Electronic Bill Presentment and Payment (EBPP)

Electronic Bill Presentment and Payment is the delivery and payment of bills to consumers via the Internet. EBPP embodies the strategic need to harness the electronic economy for competitive advantage.

Investment and Portfolio Aggregation & Analysis

A systematic approach for the delivery of client portfolio information, including performance data, the use of research tools and the communication of professional advice. The delivery of investment and mutual fund holdings information from a single source communicates information and trends.

Wireless Financial Services

Services include platforms to deliver banking, billing, investment and portfolio information via the Wireless Web. Diginexus' Wireless Financial Services Platform can deliver content to any Web-enabled device. (Phone, PDA, Palm, Interactive Pagers, Pocket PC)

Digital Asset and Document Management

Digital Asset and Document Management enables the client to manage content and data from a single source, streamlining business. These assets are created in common applications, managed and saved to an integrated database and are deployable to any channel. (Internet, Wireless, Print, etc.)

Security

Diginexus' experience in the financial industry has been complemented by the knowledge of secure information and financial transaction transfer.

financial solutions

Diginexus has a proven track-record of success in the financial services industry across a breadth of enterprises. From banking and billing to investment and portfolio aggregation, Diginexus knows finance and delivers solutions.
